

DC3V single color Flexible LED Filament

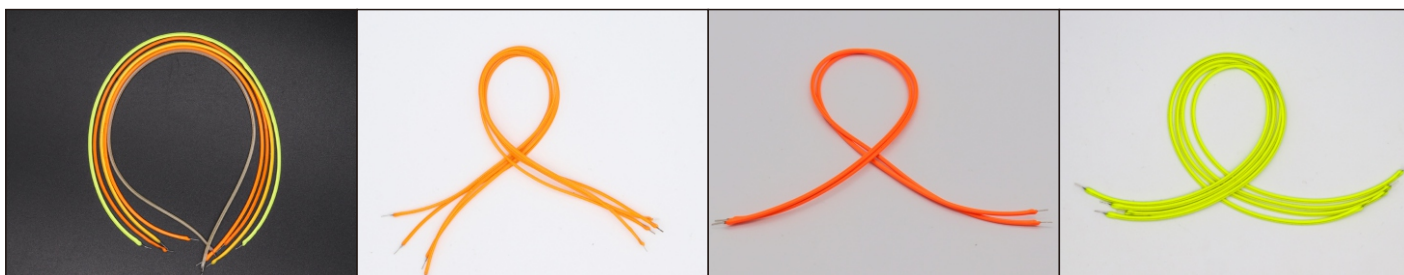

◆ Product Description:

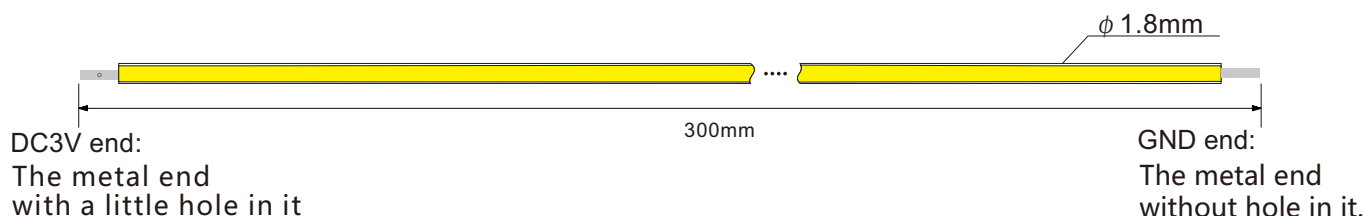

1. This Flexible LED Filament shaped into hearts or stars or just wound around to create a fun or warm lighting effect. They're made of dozens of micro LED diodes that are bonded together on an ultra flexible metal backing, then coated in colorful silicone for protection.
2. Since the LEDs are in parallel, you only need 3V to light 'em up
3. Comes one per pack. Add some mini, noodle-y neon bling to your miniature sets, dioramas, dollhouses, mini-verses. You can PWM dim them easily.
4. Simply power up with 3V by connect to both ends - the anode should be the metal end with a little hole in it.

◆ Product parameter

Product Number	CY-FRX3002-M2001
Voltage	DC3V
Power/PCS	0.6W/PCS
Size (mm)	φ 1.8mm x 300mm
Maximum rate	200MA
Color	Red, Green, Blue, Pink, Yellow, White: 2200K , 2700K
IP Rate	IP20

◆ Outline Dimension (unit: mm)

◆ Order number

Part Number	Color
CY-FRX3002-M2001-R-E	Red
CY-FRX3002-M2001-G-E	Green
CY-FRX3002-M2001-B-E	Blue
CY-FRX3002-M2001-P-E	Pink
CY-FRX3002-M2001-Y-E	Yellow
CY-FRX3002-M2001-22K-E	W:2200K
CY-FRX3002-M2001-27K-E	W:2700K
