1. Precautions in use of LCD Modules

- (1) Avoid applying excessive shocks to the module or making any alterations or modifications to it.
- (2) Don't make extra holes on the printed circuit board, modify its shape or change the components of LCD module.

Model No: SD1602H

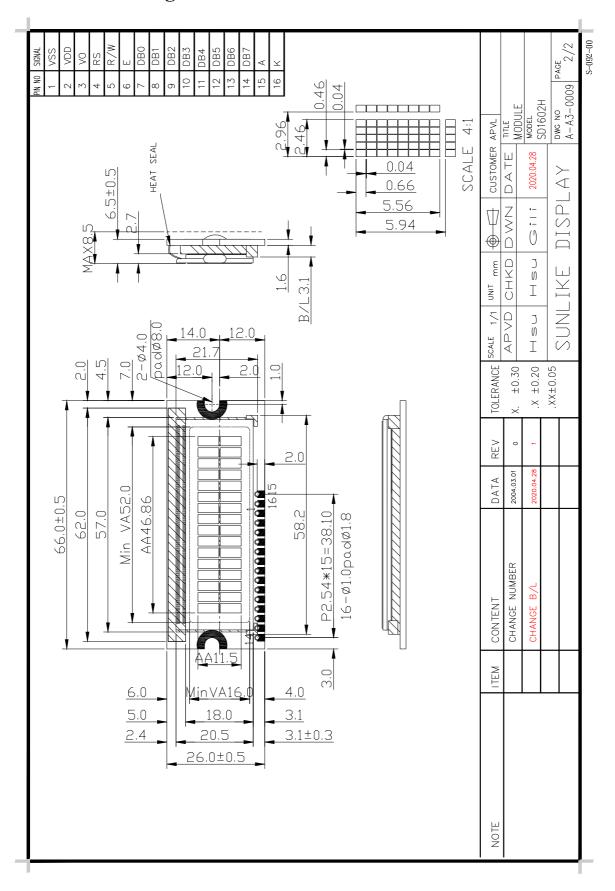

- (3) Don't disassemble the LCM.
- (4) Don't operate it above the absolute maximum rating.
- (5) Don't drop, bend or twist LCM.
- (6) Soldering: only to the I/O terminals.
- (7) Storage: please storage in anti-static electricity container and clean environment. Don't touch the elastomers connecter, especially insert a backlight panel (EL or CCFL)
- (8) LCM technological conditions RoHs

2. General Specification

| Item | Dimension | Unit |
|------------------|--------------------------------------|------|
| Dot arrangement | 16 x 2 (5*7 Dots + Cursor) | Dots |
| Module dimension | 66.0 x 26.0 x 8.5 Max | mm |
| View area | 52.0 x 16.0 | mm |
| Active area | 46.86 x 11.5 | mm |
| Dot size | 0.46 x 0.66 | mm |
| Dot pitch | 0.50 x 0.70 | mm |
| LCD type | STN / Y-G / Positive , Transflective | |
| Duty Ratio | 1/16 Duty | |
| View direction | 6 o'clock | |
| Backlight Type | LED / Orange | |
| Used IC | ST7066U / 8bit 6800 Parallel | |

Model No: SD1602H

3. Mechanical Drawing & Interface

| 15 | A | 4.0V | LED Power Supply (+) |
| 16 | K | 0V | LED Power Supply (—) |

4. Absolute Maximum Ratings

4.1 Electrical Absolute Ratings

| Item | Symbol | Min. | Max. | Unit | Note |
|--------------------------|---------------------------------|------|-------------------|------|------|
| Supply Voltage for Logic | V_{DD} - V_{SS} | -0.3 | 7.0 | Volt | |
| Supply Voltage for LCD | V _{DD} -V _O | -0.3 | 10.0 | Volt | |
| Input Voltage | V _I | -0.3 | V_{DD} | Volt | |
| B/L Power Dissipation | P _{AD} | - | 258 | mW | |
| B/L Forward current | I_{AF} | - | 60 | mA | |
| B/L Reverse Voltage | V_R | - | 5 | V | |

Model No: SD1602H

4.2 Environmental Absolute Maximum Ratings

| The second of th | Normal Temperature | | | | | | | |
|--|--------------------|-------|---------|-------|--|--|--|--|
| Item | Oper | ating | Storage | | | | | |
| | Min, | Max. | Min, | Max. | | | | |
| Ambient Temperature | 0℃ | +50°C | -20°C | +70°C | | | | |
| Humidity (without condensation) | Note | e 2,4 | Note | e 3,5 | | | | |

Note 2: Ta≤50°C: 80% RH max

Ta>50°C: Absolute humidity must be lower than the humidity of 85%RH at 50°C

Note 3: Ta at -20° C will be <120hrs when humidity is higher than 70%.

Note 4: Background color changes slightly depending on ambient temperature. This phenomenon is reversible.

Note 5: $Ta \le 70^{\circ}C$: 75RH max

Ta>70°C: absolute humidity must be lower than the humidity of 75%RH at 70°C

Note 6: Ta at -30°C will be <48hrs, at 80 °C will be <120hrs when humidity is higher than 70%.

5. Electrical Characteristics

5.1 DC Characteristics for logic and LCD

Ta=25°C,VSS=0V

Model No: SD1602H

| Item | Symbol | Condition | Min. | Тур. | Max. | Unit |

11. Instructions

Instruction Table:

| Instruction Tab | | | | Inst | ructi | on C | Code | | Description | | | |
|----------------------------------|----|-----|-----|------|-------|------|------|-----|-------------|-----|--|------------------|
| Instruction | RS | R/W | DB7 | DB6 | DB5 | DB4 | DB3 | DB2 | DB1 | DB0 | Description | Time (270KHz) |
| Clear Display | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 1 | Write "20H" to DDRAM. and set DDRAM address to "00H" from AC | 1.52 ms |
| Return Home | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 1 | х | Set DDRAM address to "00H" from AC and return cursor to its original position if shifted. The contents of DDRAM are not changed. | 1.52 ms |
| Entry Mode Set | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 1 | I/D | S | Sets cursor move direction and specifies display shift. These operations are performed during data write and read. | 37 us |
| Display ON/OFF | 0 | 0 | 0 | 0 | 0 | 0 | 1 | D | С | В | D=1:entire display on C=1:cursor on B=1:cursor position on | 37 us |
| Cursor or Display Shift | 0 | 0 | 0 | 0 | 0 | 1 | S/C | R/L | x | х | Set cursor moving and display shift control bit, and the direction, without changing DDRAM data. | 37 us |
| Function Set | 0 | 0 | 0 | 0 | 1 | DL | N | F | x | x | DL:interface data is 8/4 bits N:number of line is 2/1 F:font size is 5x11/5x8 | 37 us |
| Set CGRAM address | 0 | 0 | 0 | 1 | AC5 | AC4 | AC3 | AC2 | AC1 | AC0 | Set CGRAM address in address counter | 37 us |
| Set DDRAM address | 0 | 0 | 1 | AC6 | AC5 | AC4 | AC3 | AC2 | AC1 | AC0 | Set DDRAM address in address counter | 37 us |
| Read Busy flag and address | 0 | 1 | BF | AC6 | AC5 | AC4 | AC3 | AC2 | AC1 | AC0 | Whether during internal operation or not can be known by reading BF. The contents of address counter can also be read. | 0 us |
| Write data to RAM | 1 | 0 | D7 | D6 | D5 | D4 | D3 | D2 | D1 | D0 | Write data into internal RAM (DDRAM/CGRAM) | 37 us |
| Read data from RAM | 1 | 1 | D7 | D6 | D5 | D4 | D3 | D2 | D1 | D0 | Read data from internal RAM (DDRAM/CGRAM) | 37 us |

Model No: SD1602H

Note:

Be sure the ST7066U is not in the busy state (BF = 0) before sending an instruction from the MPU to the ST7066U. If an instruction is sent without checking the busy flag, the time between the first instruction and next instruction will take much longer than the instruction time itself. Refer to Instruction Table for the list of each instruction execution time.

Model No: SD1602H

12. DD RAM Addressing

For 16*2 Display

Character DD RAM Address

| | • | | | | | | | | | | | | | | |
|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 | 13 | 14 | 15 | 16 |
| 00 | 01 | 02 | 03 | 04 | 05 | 06 | 07 | 08 | 09 | 0A | 0B | 0C | 0D | 0E | 0F |
| 40 | 41 | 42 | 43 | 44 | 45 | 46 | 47 | 48 | 49 | 4A | 4B | 4C | 4D | 4E | 4F |

13. Reset Function

Initializing by Internal Reset Circuit

An internal reset circuit automatically initializes the ST7066U when the power is turned on. The following instructions are executed during the initialization. The busy flag (BF) is kept in the busy state until the initialization ends (BF = 1). The busy state lasts for 40 ms after VCC rises to 4.5 V.

- 1. Display clear
- 2. Function set:

DL = 1; 8-bit interface data

N = 0; 1-line display

F = 0; 5x8 dot character font

3. Display on/off control:

D = 0; Display off

C = 0; Cursor off

B = 0; Blinking off

4. Entry mode set:

I/D = 1; Increment by 1

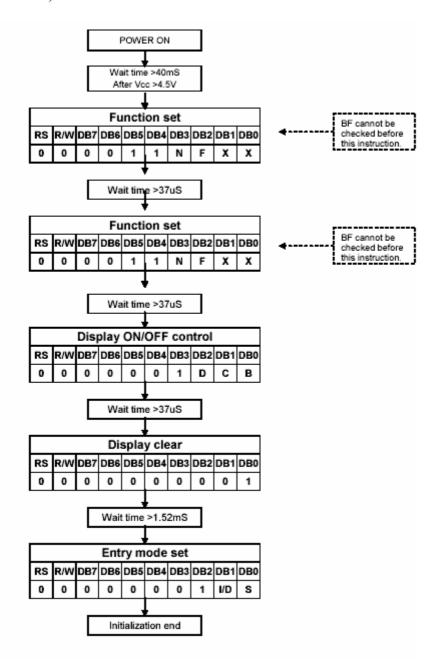

S = 0; No shift

Note:

If the electrical characteristics conditions listed in the table Power Supply Conditions (Page 31) are not met, the internal reset circuit will not operate normally and will fail to initialize the ST7066U. For such a case, initialization must be performed by the MPU as explain by the following figures.

14. Initializing by Instruction

8 bit Interface(fosc =270KHZ)

Table 5 Relationship between CGRAM Addresses, Character Codes (DDRAM) and Character patterns (CGRAM Data)

Notes:

- 1. Character code bits 0 to 2 correspond to CGRAM address bits 3 to 5 (3 bits: 8 types).
- 2. CGRAM address bits 0 to 2 designate the character pattern line position. The 8th line is the cursor position and its display is formed by a logical OR with the cursor. Maintain the 8th line data, corresponding to the cursor display position, at 0 as the cursor display. If the 8th line data is 1, 1 bits will light up the 8th line regardless of the cursor presence.
- 3. Character pattern row positions correspond to CGRAM data bits 0 to 4 (bit 4 being at the left).
- 4. As shown Table 5, CGRAM character patterns are selected when character code bits 4 to 7 are all 0. However, since character code bit 3 has no effect, the R display example above can be selected by either character code 00H or 08H.
- 5. 1 for CGRAM data corresponds to display selection and 0 to non-selection.
- "-": Indicates no effect.

Model No: SD1602H

17. Reliability

The LCD module shall have no failure in the following reliability test. However the following Test of a different item doesn't do by means of the same LCD module.

Model No: SD1602H

| Test Item | Test Conditions | Note |
|----------------------------|--|------|
| High temperature operation | $50\pm3^{\circ}$ C • t=120hrs | 2 |
| Low temperature operation | $0\pm3^{\circ}$ C , t=120hrs | 2 |
| High Temperature storage | $70\pm3^{\circ}\text{C}$, $t=120\text{hrs}$ | 1,2 |
| Low Temperature storage | $-20\pm3^{\circ}$ C , t=120hrs | 1,2 |
| Temperature Cycle | $-20^{\circ}\text{C} \sim 25^{\circ}\text{C} \sim 70^{\circ}\text{C}$ 30min. 5min. 30min. (1 cycle) Total 10 cycle | 1,2 |
| Humidity Test | 40°C, Humidity 90%, 96 hrs | 1,2 |
| Vibration Test | Sweep frequency : $10 \sim 55$, 1.5mmp-p Test direction : X.Y.Z/3 axis Duration : 60min/each axis | 2 |
| ESD Testing | Contract Discharge Voltage: $+1 \sim 5kV$ and $-1 \sim -5kV$ | 3 |
| Lob resuing | Air Discharge Voltage: +1 ~ 8kV and −1 ~ -8kV | |

- Note 1. The module should not have condensation of water on it.
- Note 2. The module should be inspected after 4-hour storage under normal Conditions (15° C to 35° C , 45° k to 65° k RH)
- Note 3. There will be discharged ten times at every discharging voltage cycle.

Energy Storage Capacitance(Cs+Cd): 150pF±10%

Discharge Resistance(Rd): 330Ω±10%

The voltage gap is 1kV.

Definitions of life end point

- (1) Current consumption is more than specified value.
- (2) Function of the module is not maintained.
- (3) There is visible degradation of appearance and display quality.
- (4) Contrast ratio is less than 50% of specified minimum value.
- (5) Brightness is less than 50% of specified minimum value.

Life Time: LCD Module 50,000hr (type)

LED Backlight 20,000hr (type)

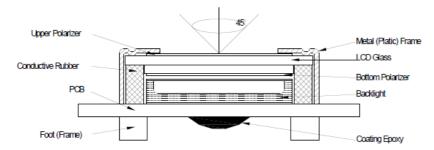

Conditions: Ta=25°C, Humidity=65±20% RH

18. Quality

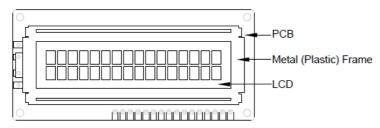

TEST CONDITIONS

- 8 1. LCM Appearance and Electric inspection Condition
- Inspection will be done by placing LCM 30cm away from inspector's eyeballs under normal illumination.

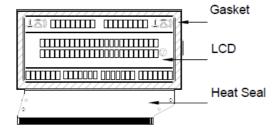

Model No: SD1602H

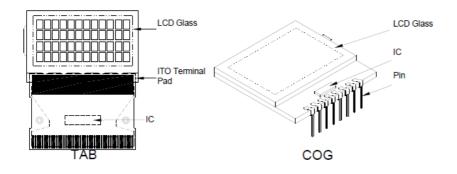

- 2. View Angle: with in 45° around perpendicular line.
- 8 2. Definition
- 1. COB

2. Heat Seal

3. TAB and COG

QUALITY SPECIFICATIONS (Continued)

8-3. Sampling Plan and Acceptance

1. Sampling Plan

MIL - STD - 105E (\parallel) ordinary single inspection is used.

2.Acceptance

Major defect: AQL = 0.25Minor defect: AQL = 0.65

8-4. Criteria

1.COB

| Defect | Inspection Item | Inspection Standards | |
|--------|-------------------------------|--|--------|
| Major | PCB copper flakes peeling off | Any copper flake in viewing Area should be greater than 1.0mm ² | Reject |
| Major | Height of coating epoxy | Exceed the dimension of drawing | Reject |
| Major | Void or hole of coating epoxy | Expose bonding wire or IC | Reject |
| Major | PCB cutting defect | Exceed the dimension of drawing | Reject |

Model No: SD1602H

2.SMT

| Defect | Inspection Item | Inspection Standa | ards |
|--------|---|------------------------------------|------------------|
| Minor | Component marking not readable | | Reject |
| Minor | Component height | Exceed the dimension Of drawing | Reject |
| Major | Component solder defect (missing, extra, wrong component or wrong orientation | | Reject |
| Minor | Component position shift component soldering pad | X < 3/4Z Y > 1/3D | Reject Reject |
| Minor | Component tilt component soldering pad | Y > 1/3D | Reject |
| Minor | Insufficient solder component PAD | θ ≤ 20° | Reject |

QUALITY SECIFICATIONS (Continued)

- 8-4. Criteria (Continued)
- 3. Metal (Plastic) Frame

| Defect | Inspection Item | Inspec | tion Standard | ds | | | |
|--------|-------------------------|--|---------------------|---------------------------------|--|--|--|
| Major | Crack / breakage | Anywhere | e | Reject | | | |
| | | W L | | Acceptable of Scratch | | | |
| | | w<0.03mm | Any | Ignore | | | |
| | | 0.03mm <u><</u> w<0.25mm | L <u><</u> 5.0mm | 5 | | | |
| Minor | Frame Scratch | 0.25mm <u><</u> w<0.4mm | L <u><</u> 5.0mm | 3 | | | |
| | | w <u>></u> 0.4mm | Any | 0 | | | |
| | | Note: 1. Above criteria applicable to scratch lines with distance greater than 5mm. 2. Scratch on the side face of frame (not visible) can be ignored. | | | | | |
| | | | | Acceptable of Dents / Pricks | | | |
| | | Φ <u><</u> 1.0mr | n | 5 | | | |
| | Frame Dent, Prick | 1.0<⊕ <u><</u> 1.5 | mm | 3 | | | |
| Minor | $\Phi = \frac{L + W}{}$ | 1.5mm>(| Þ | 0 | | | |
| | 2 | Note: 1. Above criteria applicable to any two dents / pricks with distance greater than 5mm 2. Dent / prick on the side face of frame (not visible) can be ignored | | | | | |
| Minor | Frame Deformation | n Exceed the dimension of drawing | | | | | |
| Minor | Metal Frame Oxidation | | | | | | |

Model No: SD1602H

4. Flexible Film Connector (FFC)

| Defect | Insp | ection Item | Inspection Standa | rds | |
|----------|--|---------------------------|------------------------------|------------|--|
| Minor | Tilte | d soldering | Within the angle <u>+</u> 3° | Acceptable | |
| Minor | Uneven s | older joint /bump | | Reject | |
| Minor | Hala | Ф= <u>Г+М</u> | Expose the conductive line | Reject | |
| Minor | Hole | Φ^{-} 2 | Ф > 1.0mm | Reject | |
| Minor | Position s | hift →Z _K V | Y > 1/3D | Reject | |
| IVIIIIOF | ************************************** | | X > 1/2Z | Reject | |

QUALITY SPECIFICATIONS (Continued)

8-4. Criteria (Continued)

5. Screw

| Defect | Inspection Item | Inspection Standards | |
|--------|----------------------|----------------------------------|--------|
| Major | Screw missing/loosen | | Reject |
| Minor | Screw oxidation | Any rust | Reject |
| Minor | Screw deformation | Difficult to accept screw driver | Reject |

Model No: SD1602H

6. Heat seal . TCP . FPC

| Defect | Inspection Item | Inspection Standards | |
|----------|----------------------------------|-----------------------------|--------|
| Major | Scratch expose conductive layer | | Reject |
| Minor | HS Hole $\Phi = \frac{L + W}{2}$ | Φ> 0.2mm | Reject |
| Major | Adhesion strength | Less than the specification | Reject |
| Minor | Position shift | Y > 1/3D | Reject |
| IVIIIIOI | X | X > 1/2Z | Reject |
| Major | Conductive line break | | Reject |

7. LED Backing Protective Film and Others

| Defect | Inspection Item | Inspection Standards | | | | |
|--------|----------------------|--|--------|--|--|--|
| | | Acceptable number of units | | | | |
| | | Ф <u><</u> 0.10mm | Ignore | | | |
| | | 0.10<⊕ <u><</u> 0.15mm | 2 | | | |
| Minor | LED dirty, prick | 0.15<⊕ <u><</u> 0.25mm | 1 | | | |
| | | Φ>0.25mm | 0 | | | |
| | | The distance between any two spots should be <u>></u> 10mm Any spot/dot/void outside of viewing area is acceptable | | | | |
| Minor | Protective film tilt | Not fully cover LCD | Reject | | | |
| Major | COG coating | Not fully cover ITO circuit | Reject | | | |

8. Electric Inspection

| Defect | Inspection Item | Inspection Standards | |
|--------|-----------------|----------------------|--------|
| Major | Short | | Reject |
| Major | Open | | Reject |

19. Handling Precaution

1. Mounting Method

The panel of the LCD Module consists of two thin glass plates with polarizes which easily get damaged since the Module is fixed by utilizing fitting holes in the printed circuit board. Extreme care should be taken when handling the LCD Modules.

Model No: SD1602H

2. Caution of LCD handling & cleaning

When cleaning the display surface, use soft cloth with solvent (recommended below) and Wipe lightly.

- -Isopropyl alcohol
- -Ethyl alcohol
- -Trichlorotriflorothane

Do not wipe the display surface with dry or hard materials that will damage the polarize surface.

Do not use the following solvent:

- -Water
- -Kettle
- -Aromatics

3. Caution against static charge

The LCD Module use C-MOSLSI drivers, so we recommend end that you connect any unused input terminal to VDD or VSS, do not input any signals before power is turned on. And ground your body, Work/assembly table. And assembly equipment to protect against static electricity.

4. Packaging

Modules use LCD elements, and must be treated as such. Avoid in tense shock and falls from a height.

To prevent modules from degradation. Do not operate or store them exposed directly to sunshine or high temperature/humidity.

5. Caution for operation

It is indispensable to drive LCD's with in the specified voltage limit since the higher voltage than the limit shorten LCD life.

Model No: SD1602H

An electrochemical reaction due to direct current causes LCD deterioration, Avoid the use of direct current drive.

Response time will be extremely delayed at lower temperature than the operating temperature range and on the other hand at higher temperature LCD's show dark color in them. However those phenomena do not mean malfunction or out of order with LCD's. Which will come back in the specified operating temperature range.

If the display area is pushed hard during operation, some font will be abnormally displayed but it resumes normal condition after turning off once.

A slight dew depositing on terminals is a cause for electro-chemical reaction resulting in terminal open circuit. Usage under the relative condition of 40 °C, 50%RH or less is required.

6. Storage

In the case of storing for a long period of time (for instance. For years) for the purpose or replacement use, The following ways are recommended.

Storage in a polyethylene bag with sealed so as not to enter fresh air outside in it, And with no desiccant.

Placing in a dark place where neither exposure to direct sunlight nor light is. Keeping temperature in the specified storage temperature range.

Storing with no touch on polarizer surface by the anything else. (It is recommended to store them as they have been contained in the inner container at the time of delivery)

7. Safety

It is recommendable to crash damaged or unnecessary LCD into pieces and wash off liquid crystal by using solvents such as acetone and ethanol. Which should be burned up later.

When any liquid crystal leaked out of a damaged glass cell comes in contact with your hands, please wash it off well with soap and water.

Model No: SD1602H

20. Packing Method
